Mr. and Mrs. E. L. Chick had their dinner guests on Sunday Mr. and Mrs. Henry Beard and family.

Now... no wheat used in beer or ale

And wheat alone can solve the problem of feeding the world's hungry

Actually wheat has never been a large item in the brewing process—only 100% of the entire U.S. wheat crop was used in 1945.

In accordance with United States Government policy, the brewing industry has used no wheat whatever since March 1, 1946.

OTHER MATERIALS CUT 30%

The other grains used have been reduced by 30%—that is, to 70% of the 1945 amount.

Wheat alone can solve the problem of feeding the hungry. The grains to which the industry is now restricted, are of a variety and grade not normally consumed by the people of the world as food.

LESS BEER AND ALE

Altogether, the brewing industry is using 30% less materials than in 1945. This results in a proportionately lower production. But since the current demand for beer and ale is about 25% greater than a year ago, the real shortage is nearer 50%.

Consequently, your dealer will not be able to supply you with all the beer and ale you would like. We know you will understand the reason for this.

Your attention is earnestly directed to the recommendations of President Truman's Famine Emergency Committee, which are summarized in the box below.

The statement tells in clear, simple terms what each of us individually can do to help during the emergency.

What the President's Famine Emergency Committee asks us all to do

1. Save and share wheat and fat products... Go light on all foods that take wheat, fats and oils—meat, cakes, cookies, pastries and deep-fried foods. Use drippings for pan-frying. Save salad oil—use bottled dressings.
2. Buy and serve more plentiful foods... Balance diets with the more plentiful foods, such as potatoes, fresh fruits and vegetables.
3. Waste NO food... Dress up today's leftovers for tomorrow. Make every crust count with mella toast, crumb-toppings, bread puddings and stuffings. Take no more than you can eat. Clean your plate. Turn in uneaten fat savings promptly.

How women and girls may get wanted relief from functional periodic pain

CARDUI

1. It should stimulate the system, and thus help build resistance for the "blues".

2. Started 3 days before the start of the period, it should help relieve pain due to functional periodic causes. It is helpful, too, if you are not sure you did it.

Quality is Economy

Buckingham Flygon

100 MAIN ST. LYNCHBURG, VIRGINIA

"I'll bet her husband is sick of can-opener suppers!"

"I don't care what they say over the backyard fence!"

"YES, LADIES of the backyard brigade. I do take time out for fun. I do have time for bridge, and matinees with the children, and for my Red Cross work. But there'll be no kitchen divorce in my family... they like the way I feed 'em!"

It's simple, ladies: our heroine has a modern Automatic Electric Range. It has switches you set and forget. Controls that turn themselves on, low, or off at the right time. Exact cooking speeds for all needs. Meals cook to perfection whether you're in the kitchen or miles away!

And that's not all! Electric Cooking is cool, clean, safe, and economical. Quick, accurate, and easily controlled. New Automatic Electric Ranges — coming soon!
